GRIFFIN MURJAN TRAVEL COMPANY PROFILE

Vision

To develop corporate travel management in Yemen.
To provide companies and organizations with professional corporate travel management.

Mission

Murjan Travel is committed to the goal of making business travel more efficient, comfortable and cost effective. We have made it our mission to specialize in corporate travel management and to share the benefits with our clients. While customer satisfaction guides our policies, service orientation and international standards are goals we never compromise.

About Us

Welcome to Murjan Travel!

Murjan Travel provides first-class corporate travel management services to international and national organizations in Yemen. We draw on extensive experience in business travel services and specialize in offering customized packages for each client. We strongly believe that corporate clients require a range of specific services which are crucial for the successful management of their travel programs. This is why we differentiate ourselves from conventional travel agencies and focus exclusively on designing travel solutions for corporate clients.

We take the time to understand our clients' needs. Dedicated account managers work with you to analyze your specific travel requirements. Our travel management strategy is based on your priorities and takes into consideration that you may have traveler profiles that require different levels of service. But we don't simply assist you in the booking of tickets and hotels but provide you with the tools to maximize your entire travel management system. Enhancing your travel policies,

reducing corporate travel expenses without compromising service and providing hassle-free procedures are among the benefits we work towards with our clients.

The use of the latest technology in the travel industry enables us to provide you with state-of-the-art travel solutions. Our network systems can offer you "best fare" ticketing as well as comprehensive reporting through our Management Information System (MIS). Monitoring and analyzing the travel patterns of your employees will enable you to exercise full control over your travel planning and budgeting.

Murjan Travel has assembled a team of highly-trained and skilled travel coordinators in order to provide the highest-quality services to our clients. Experience and expertise are important factors for us when we chose our staff. Our team combines more than 100 years of experience in travel management.

New Clients

Many of our clients have employees with a wide range of different requirements. As a travel management service provider we focus on providing business level services that match the individual requirements especially if your travelers include executives, technical experts and senior managers. We cater to the specific needs of your traveler profiles. For clients that outsource their entire travel management, we are in a position to provide a dedicated account manager. The account manager serves as direct point of contact for any comments, suggestions or changes in your travel policy. Individual requirements can easily be taken into consideration in order to plan and manage the travels of your staff in an adequate manner. The account manager will work with you to ensure better understanding of your own objectives and ensure that our travel management strategy matches your expectations.

For large corporate clients, the in-house ticketing agent

is equally important. One of our employees equipped with a fully-functional electronic booking system can be located directly in your office premises in order to process travel requirements. Ad-hoc or emergency bookings can be undertaken without delay or additional stress. The coordination of ticket reservations, issuing of tickets and overall travel planning between our client and Murjan Travel is made easy and will at the same time facilitate the administrative process involved in the organization of travels.

Furthermore, corporate clients can draw on a full range of services which includes services such as in-house ticketing agents, visa and immigration services, meet and greet services at Sana'a airport, pre-booked travel and hotel arrangements for rotating staff, complimentary enrolment in frequent flyer programs and staff personal leave benefits.

Consulting

Murjan Travel will bring its full expertise in corporate travel management to the table and act as a consultant in order to analyze your travel procedures and identify areas of improvement related to cost-efficiency as well as operations. Many clients welcome our assistance in advising them on how to outline their travel policies and procedures. In coordination with you, we will design a customized travel management plan that best fits your operational and budgetary requirements. Professional travel management involves a continuous process of adjusting existing travel systems. Your requirements may change over time and make corrections necessary in order to fit the reality of your company's travel needs. Sudden staff increases, new project locations or new travel destinations can impact your travel policy significantly and lead to undesired effects. This makes it even more important to constantly monitor the travel patterns in order to guarantee that best results can be achieved at all times. Our state-of-the-art back office systems and

travel software collects information which will allow us to ensure that your travel management systems are updated and create the best results for your company. Detailed reports can be prepared for managers and decision-takers to keep you fully informed at all times about all aspects of the travel management system.
