

Griffin Medical Company Profile

2019

Vision, Mission, and Values

- Vision: Griffin Medical aims to be the leader in the diagnostics field, developing diagnostics solutions, products and services in line with the demands of the market.
- Mission: To provide efficient, reliable, cost effective and professional service to our customers through a skilled, dedicated and loyal team of employees.
- Values: We build long-term partnerships with our clients that are based on mutual trust, discretion, integrity and reliability. Our employees are proud to be part of Griffin Medical family playing a crucial role in its success.

Griffin Medical was founded in Yemen in 1996, in response to the growing local need for improved diagnostics. Griffin Medical supplies both public and private laboratories with medical instruments and reagents from reputed international suppliers. Griffin Medical has rapidly emerged as a preferred vendor in the field of medical diagnostics, scientific diagnostics and point of care and now supplies approximately 40% of the Yemeni diagnostics market. It represents Abbott, Human, and Helena. Griffin Medical prides itself on its responsiveness to the market, offering access to advanced technology, flexible purchasing options, rapid delivery and excellent technical support. Griffin Medical is a member of Griffin Group, and is an ISO9001:2000 certified company.

Griffin Medical supplies to clinical laboratories working in hematology, chemistry, virology and hormones analysis.

Products include:

- Clinical chemistry systems
- Hematology analysis systems
- Immunochemistry systems
- Reagents
- Quality control chemistry
- Electrophoresis
- PoC products
- Technological scientific diagnostics: analytical, scientific and measuring equipment
