

GRIFFIN
INTERNATIONAL

COMPANY PROFILE

Griffin International Company

undertakes projects in the Middle East and Africa and provides consultancy and services in Construction, Energy Services, Medical Diagnostics, Renewable Energy, Information Technology and Logistics.

Griffin International has a strong track record of successfully delivering in hardship countries and remote areas in the Middle East, West Asia and East Africa. Various contracts have been undertaken in places as diverse as Yemen, Dubai, Iraq, Kenya, Tanzania, Djibouti, Zambia, and Uganda. Clients include governments and multinational companies.

Griffin International has developed strong partnerships with primary IT hardware suppliers, including Hewlett Packard, Dilettta, and Dell. Complementary products and services are sourced from industry leaders such as Oracle, Microsoft, Linux, Lockheed Martin, G&D, ESET, Accu-Time Systems, CISCO and 3Com. Griffin International continues to acquire high-tech IT solutions through supplier relationships and in-house development of software applications.

Griffin International also operates as a systems integrator and developer, and a hardware/software provider. We provide consultancy and support services for:

- Secure document printing.
- Systems integration, design and development.
- Networking.
- Hardware supply consultancy.
- Support and training.
- Pre-deployment consultancy, supply during deployment, and post deployment services.
- Needs assessment site surveys.
- System software design and development.
- IT network design.
- Hardware testing and commissioning.
- System performance and usage monitoring.
